

PROTECTION
SPECIALISTS

COMPANY PROFILE

CHAIRMAN MESSAGE.」

Protection Specialists strategically positioned in the region, showcasing robust geographical expansion and a diverse range of offerings. Our future-oriented approach propels us to explore new industries and markets, fostering optimism for the company's growth.

Our extensive portfolio of protection products, coupled with dedicated projects and services, reinforces our security expertise and progress.

This forward-looking philosophy underpins our sustained success, as we commit to executing plans with unwavering determination and excellence. We extend best wishes to the board, management team, and our diligent employees.

Warm regards,

ALI AWAD
CHAIRMAN

ABOUT US. ↓

Leadership

We at Protection Specialists strive to be the leaders in what we do. We are market leaders in our industry in the region and we will continue being so through our constant efforts and dedication to excellence. Leadership is reflected across all dimensions of our company, be it through the products and solutions we offer, the key accounts we hold and seek or our dedicated and well trained personnel.

CUSTOMER SATISFACTION

At Protection Specialists, customers are paramount. Our focus on quality, responsiveness, and reliability underscores our commitment to their contentment. Building strong relationships and partnerships further distinguishes us.

QUALITY

Quality is integral to Protection Specialists. Our process begins by recruiting top talent, followed by comprehensive training, strategic partnership selection, and deploying state-of-the-art maintenance solutions.

INTEGRITY:

Integrity defines us at Protection Specialists, resonating internally and externally in our interactions with suppliers, customers, and competitors. Our personnel embody values of honesty, trust, and fairness, earning us widespread recognition in the market.

TEAMWORK

Collaboration is the cornerstone of our operations, enabling us to deliver comprehensive turnkey solutions. Our experienced team members, with years of shared experience, seamlessly integrate and mentor new joiners, fostering a unified approach.

Key Facts

- 🛡️ Founded by experienced engineers from diverse industries.
- 🛡️ Our team excels in designing, installing, and commissioning various systems.
- 🛡️ Company boasts 50+ employees, including 10 skilled engineers, technicians, and a renowned sales team.
- 🛡️ Leveraging advanced equipment, we offer turnkey solutions through established project management and implementation capabilities.
- 🛡️ Each project is led by a dedicated Project Manager and a team of engineers and technicians, guaranteeing optimal performance and successful completion.

ABOUT US. ↓

Mission

Our mission at Protection Specialists is to deliver exceptional solutions and services by employing advanced engineering techniques, meeting the highest global standards.

Vision

We aspire to be a leading solutions provider in the region, known for our integrity, quality, and reliability the pillars of customer satisfaction.

About us

Protection Specialists is a synergy of forward looking management and dedicated professionals, offering tailored solutions for corporate and government markets. We excel in designing, implementing, and activating client-centric solutions based on strategic partnerships.

We offer a wide range of premium solutions, including Low Current security systems, Automation, Fire Protection, and Software development. Through partnerships with globally renowned security firms, we proudly provide comprehensive products, services, and technologies designed to safeguard individuals, assets, and information.

OUR SERVICES. ┘

OUR SERVICES. ┘

CONSULTANCY

Consultancy Protection Specialists offer expertise to facilities in need of Protection Consultancy. Our skilled engineers analyse potential risks and suggest strategies to uphold security.

ENGINEERING

Protection Specialists features a well-staffed Engineering department, including certified professional engineers with over 10 years of experience. Our services span innovative product development, comprehensive system design, installation, maintenance, and operation.

PROJECT MANAGEMENT

With a cumulative experience exceeding 30 years, the Protection Specialists project management team demonstrates the knowledge and capability to address all protection needs. From inception to installation, our team adeptly oversees your project from start to finish.

MAINTENANCE

Our maintenance ensures enduring peak performance for your protection products. Supported by warranties, our innovative products provide client peace of mind. We also offer maintenance for existing equipment.

TRAINING

Swift and appropriate personnel response is paramount during facility threats. Our comprehensive training ensures preparedness to tackle security challenges. Collaborating with clients, we tailor training modules to cater to specific personnel needs.

OUR PRODUCTS. ┘

OUR PRODUCTS. ┘

Low Current Security:

As the premier low current system integrator in the Region, PROTECTION SPECIALISTS offers unparalleled value-added services in low current solutions.

Automation:

Elevate efficiency and precision while saving time, energy, and resources. Our automation solutions harness various control systems to optimise equipment operation.

Fire Protection:

Armed with fire protection expertise, we conduct hazard and causative analyses, surveying construction or operating premises to enhance pre-fire and post-fire safety.

Digital Transformation:

Our IT solutions empower leading businesses across sectors. We excel in delivering top-tier products from global leaders, driving digital transformation.

Telecom:

PROTECTION SPECIALISTS maximises product utilisation from renowned suppliers like Motorola Solutions, fostering strong relationships in the wireless industry.

Secure Identity:

In an era of technology democratisation, virtual security is paramount. PROTECTION SPECIALISTS crafts cutting-edge digital security solutions tailored for businesses, governments, and individuals.

Cyber Security:

Specialising in cyber security, our mission centres on safeguarding governments, military bodies, and critical national infrastructure from cyber threats

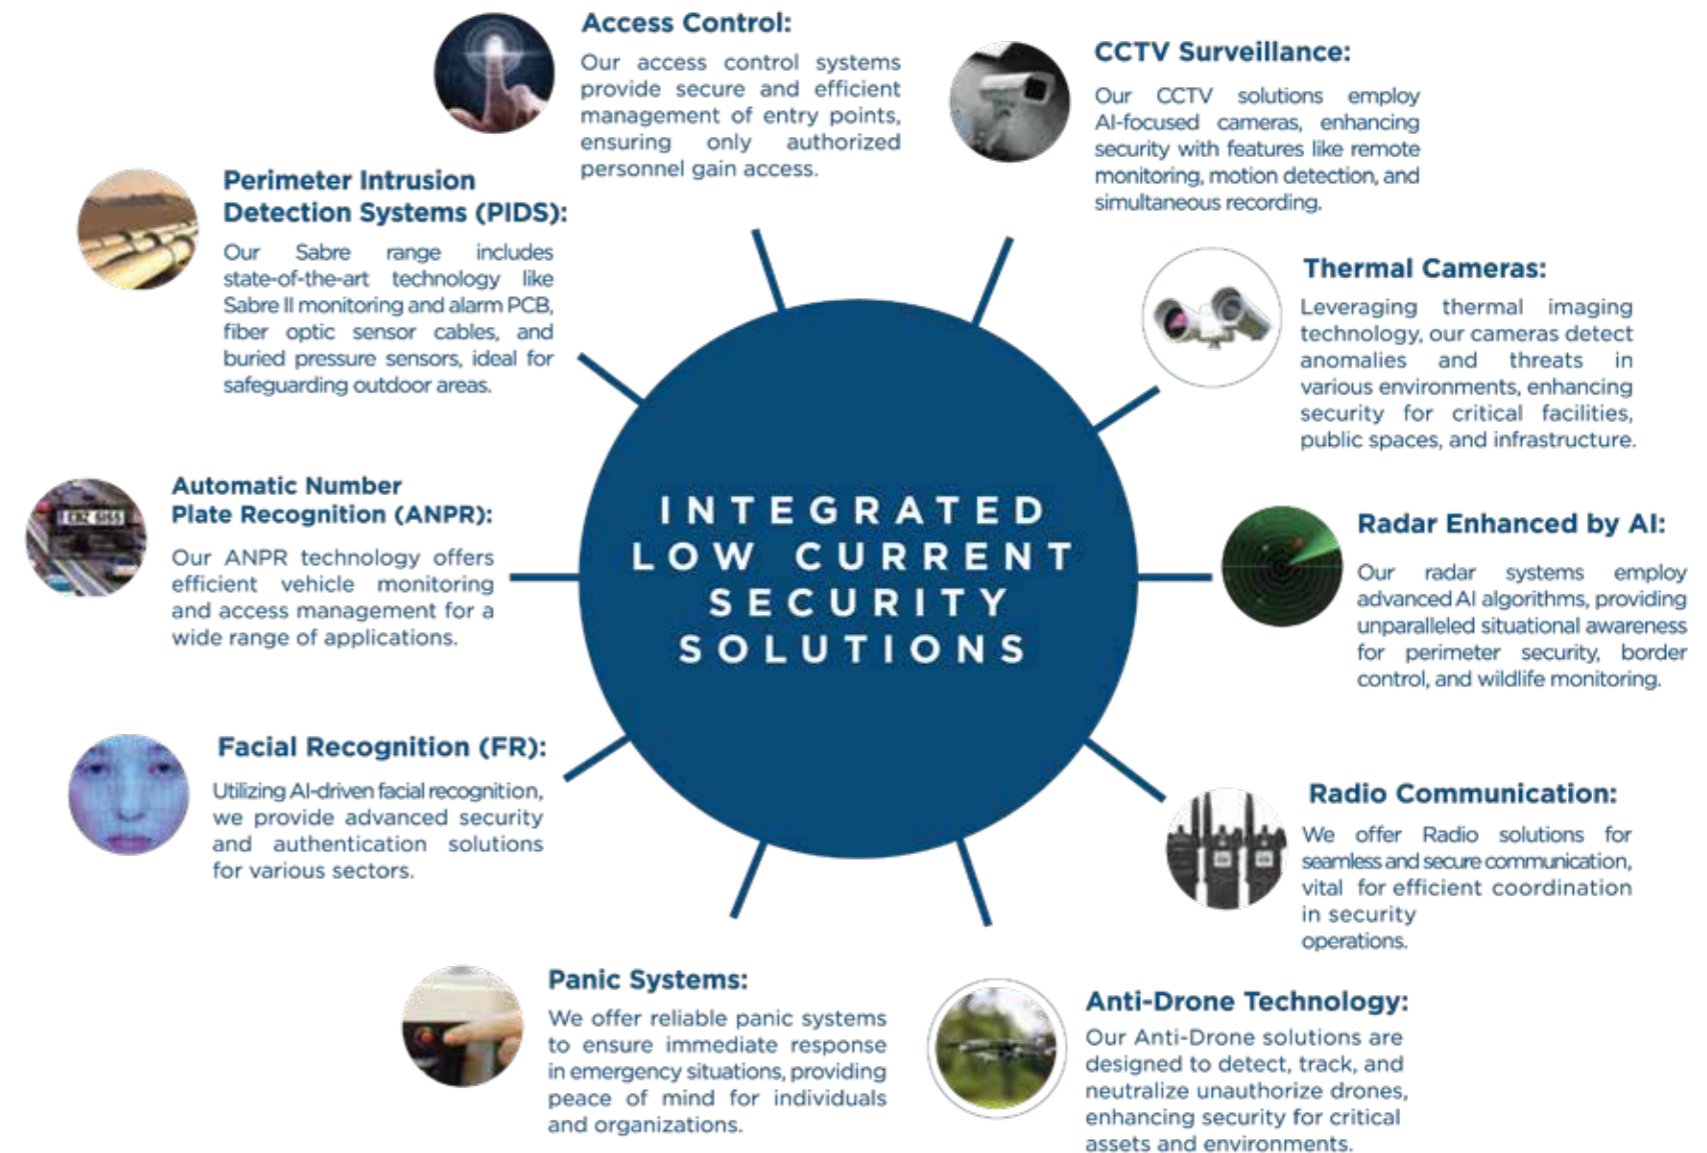

LOW CURRENT SECURITY. ┘

Integrated Low Current Security Solutions

At Protection Specialist, we understand that modern security demands a comprehensive approach. Our commitment to safeguarding what matters most has led us to pioneer an integrated low current security platform that seamlessly combines an array of cutting-edge technologies. This integration empowers you with unprecedented control, efficiency, and security.

LOW CURRENT SECURITY. ┘

Key Components of Our Integrated Low Current Systems:

Our integrated low current security systems provide a holistic solution, offering real-time monitoring, rapid response capabilities, and unparalleled protection. Whether you need to secure critical infrastructure, public spaces, or sensitive areas, Protection Specialist is your trusted partner in achieving comprehensive security and peace of mind.

LOW CURRENT SECURITY.」

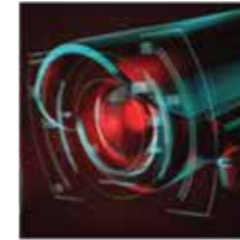

CCTV REMOTE SURVEILLANCE SOLUTIONS:

In today's realm of modern security, safeguarding businesses and homes against the backdrop of increasing crime is paramount. Among the crucial solutions, AI-focused CCTV cameras shine, effectively deterring intruders and enhancing security. Recent years have witnessed a surge in the role of video surveillance, with features like remote monitoring, motion detection, and simultaneous recording bolstering security layers.

Identifying vulnerabilities for a robust system design is key, alongside the need for precise image details to meet diverse needs. Our expertise lies in factoring environmental nuances, underscoring the role of specialists in this domain.

LOW CURRENT SECURITY.」

CCTV REMOTE SURVEILLANCE SOLUTIONS

AI CAMERA

AI-powered algorithms deliver notable advantages in live monitoring and incident analysis, functioning ceaselessly 24/7 without fatigue. This boosts operational efficiency and workload handling in monitoring and control settings without personnel increases. The solution averts incidents, providing immediate comprehensive coverage without the costs of traditional intrusion and surveillance systems.

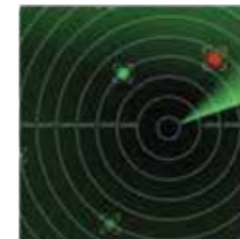

Face Recognition

Our team has developed an advanced Facial Recognition System, empowered by AI technology. This computer application excels at identifying and verifying individuals from digital images or video frames. It achieves this by comparing specific facial features with a facial database, ensuring precision and speed. Protection Specialists offers the fastest and most accurate facial recognition solution, contributing to community safety.

ANPR (AUTOMATIC Number Plate Recognition)

Protection Specialist is a premier company specializing in low current security solutions, which includes cutting-edge Automatic Number Plate Recognition (ANPR) technology. With a steadfast commitment to enhancing security and surveillance, we offer comprehensive ANPR solutions tailored to your specific needs. Our expertise ensures that you receive top-tier security systems that effectively monitor and manage vehicle access, making us your trusted partner for reliable low current security solutions.

Advanced Radar Enhanced by AI:

Protection Specialist is a leading company specializing in low current security solutions. Our expertise lies in providing state-of-the-art security systems, including Advanced Radar Intelligence Enhanced by AI. With a commitment to safeguarding your assets and environments, we leverage cutting-edge technology and artificial intelligence to deliver unmatched situational awareness and protection. Whether it's perimeter security, border control, or wildlife monitoring, our solutions are tailored to ensure your safety and security. Trust Protection Specialist for innovative and reliable low current security solutions that are powered by advanced AI-driven Radar Intelligence

Antidrone

Protection Specialist is a leading provider of low current security solutions, offering a comprehensive range of services that include cutting-edge Anti-Drone technology. With a dedicated focus on enhancing security and mitigating aerial threats, our Anti-Drone solutions are designed to safeguard critical assets and sensitive areas. As a trusted partner in low current security, we deliver innovative and effective systems to detect, track, and neutralize unauthorized drones, ensuring unparalleled protection for your environment. Rely on Protection Specialist for state-of-the-art security solutions that address the evolving challenges of today's world.

LOW CURRENT SECURITY. ↓

CCTV REMOTE SURVEILLANCE SOLUTIONS

THERMAL CAMERA

Vital for Homeland Security, border protection faces challenges in darkness and harsh conditions. AI-enhanced thermal imaging aids in detecting intruders and smugglers. As expert system integrators, Protection Specialists combine thermal cameras, radars, HD cameras, and electronic fences for optimal border control.

VMS

Video Management Systems (VMS) bridge camera data, storage, and security management. At Protection Specialist, we employ advanced VMS solutions and a unified security platform, seamlessly integrating IP surveillance into an intuitive interface for streamlined operations.

VIDEO WALLS

Protection Specialists offers premium commercial-grade digital video walls. Ideal for dynamic signage and informative applications, our advanced solutions now include AI technology. With exclusive features, LED backlighting, and high-definition resolution, installation is a breeze, creating captivating video walls.

CITY SURVEILLANCE

Enhancing citizen safety within budget and infrastructure constraints is crucial. Protection Specialists' AI-powered solutions overcome these challenges, extending coverage, speeding up investigations, and bypassing limitations in power and communication infrastructure.

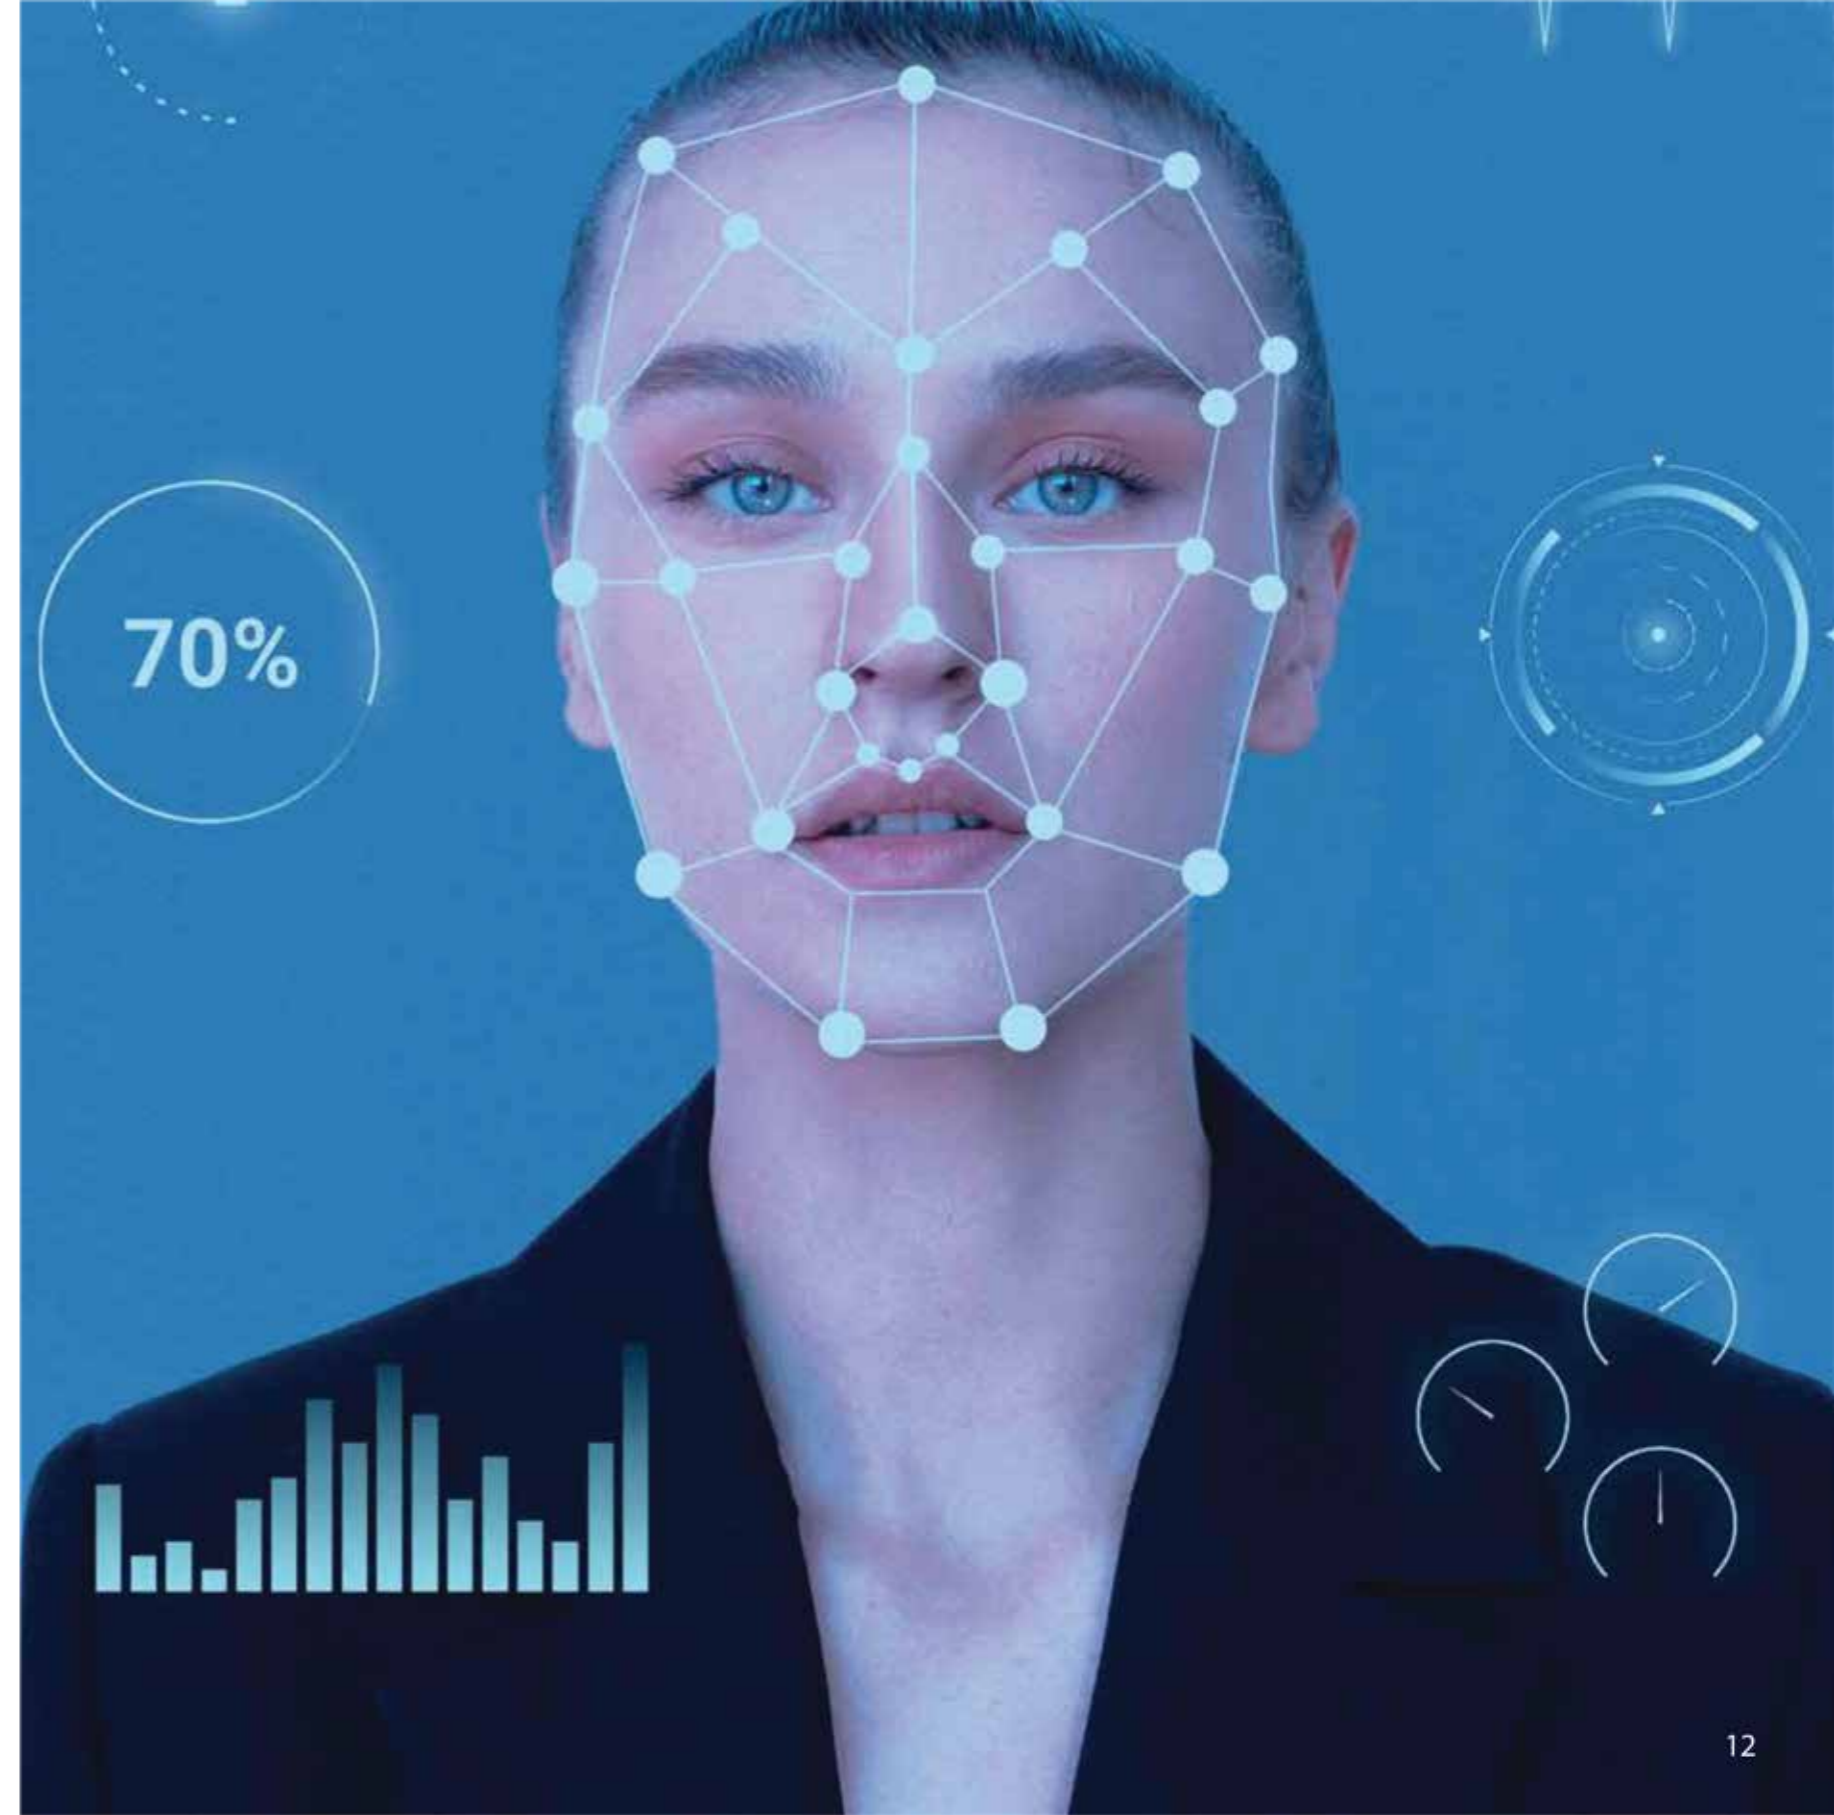

UVIS

Elevate security with Protection Specialists' AI-driven Vehicle Inspection System (UVIS). A core part of our electronic monitoring solutions, UVIS swiftly examines vehicle undercarriages, offering magnifiable full-color images via a user-friendly touch-screen interface. Rapid and thorough inspections in seconds set a new safety standard.

Radio Communication

Protection Specialists offer low current security solutions, including advanced Motorola Radio Technology. Trust us for seamless and secure communication, enhancing your security operation's efficiency and effectiveness.

LOW CURRENT SECURITY.」

ACCESS CONTROL SYSTEMS

At Protection Specialists, we stand as the foremost company in Iraq, with a remarkable track record that includes major GSM operators and numerous oil companies among our satisfied clients. Our Access Control solutions are celebrated for their exceptional adaptability and effectiveness. What distinguishes us is our capability to convert access logs into insightful Time Attendance reports and seamlessly integrate them with HRMS and Payroll systems, a feature that has been demonstrated through numerous successful installations.

Safety is our utmost priority, particularly in workplaces characterized by diverse environments and vulnerabilities. Our Access Control system serves as your all-encompassing security solution, proficiently managing entries and exits while ensuring the well-being of personnel, safeguarding assets, and securing sensitive data. We specialize in crafting flexible solutions customized to suit your distinctive needs, whether it's for an apartment building, school, hospital, bank, or office. Our expertise guides you in making the optimal system selection, which includes cutting-edge card readers and advanced biometric technologies such as fingerprint, iris, and facial recognition.

Our Available Access Systems Encompass:

- Door Access System
- Vehicle Access System
- Lift Access System

LOW CURRENT SECURITY.」

ACCESS CONTROL SYSTEMS

TIME ATTENDANCE INTEGRATION

Streamline your HR and payroll operations with Protection Specialists' Time Attendance Integration. Through seamless integration with your existing systems, we guarantee precise and efficient payroll processing. Our global clients enjoy the convenience of effortlessly sharing time and attendance data, eliminating the need for manual data entry. This solution is designed for speed, automation, and ease, enabling you to concentrate on your core priorities.

HRMS

Enhance your HR management with Protection Specialists' cutting-edge Human Resource Management System (HRMS). Our AI-driven software seamlessly integrates HR and IT, streamlining your operations. It expedites payroll processing and automates tasks like time calculations and reconciliations. With our HRMS, you can elevate your HR department's efficiency and accuracy, enabling you to focus on strategic HR initiatives that drive your organization's success.

PAYROLL SYSTEM

Streamline your payroll operations with Protection Specialists' comprehensive Payroll System. Our solution ensures precision and efficiency in processing payroll, leaving no room for errors. By seamlessly integrating with our Time Attendance system and HRMS, you'll enjoy a seamless end-to-end process that saves time and resources while ensuring your employees are accurately compensated. With our Payroll System, you can confidently manage one of the most critical aspects of your business, knowing that it's in capable hands.

At Protection Specialists, we're dedicated to providing you with the best Access Control solutions, Time Attendance Integration, HRMS, and Payroll System, all tailored to your specific needs. Our commitment to excellence and our track record of success make us your ideal partner in security and workforce management.

ROAD BLOCKERS

TURNSTILE AND SLIDING GATES

PIPELINE PROTECTION SECURITY PLATFORM

PIPELINE PROTECTION SECURITY PLATFORM

PIPELINE PROTECTION

Revolutionise pipeline security with our AI-driven solutions, promptly detecting, classifying, localizing, and responding to threats like third-party interference. Swift incident response is crucial as leakage from a compromised pipeline can result in severe environmental and economic damage, exacerbated by delayed detection. Traditionally, pinpointing leaks can take days, a significant concern given the vast pipeline network. Our tailored approach combines physical and technology-based security systems, delivering early warning, deterrence, and threat denial across onshore and offshore pipelines, effectively safeguarding their security and safety.

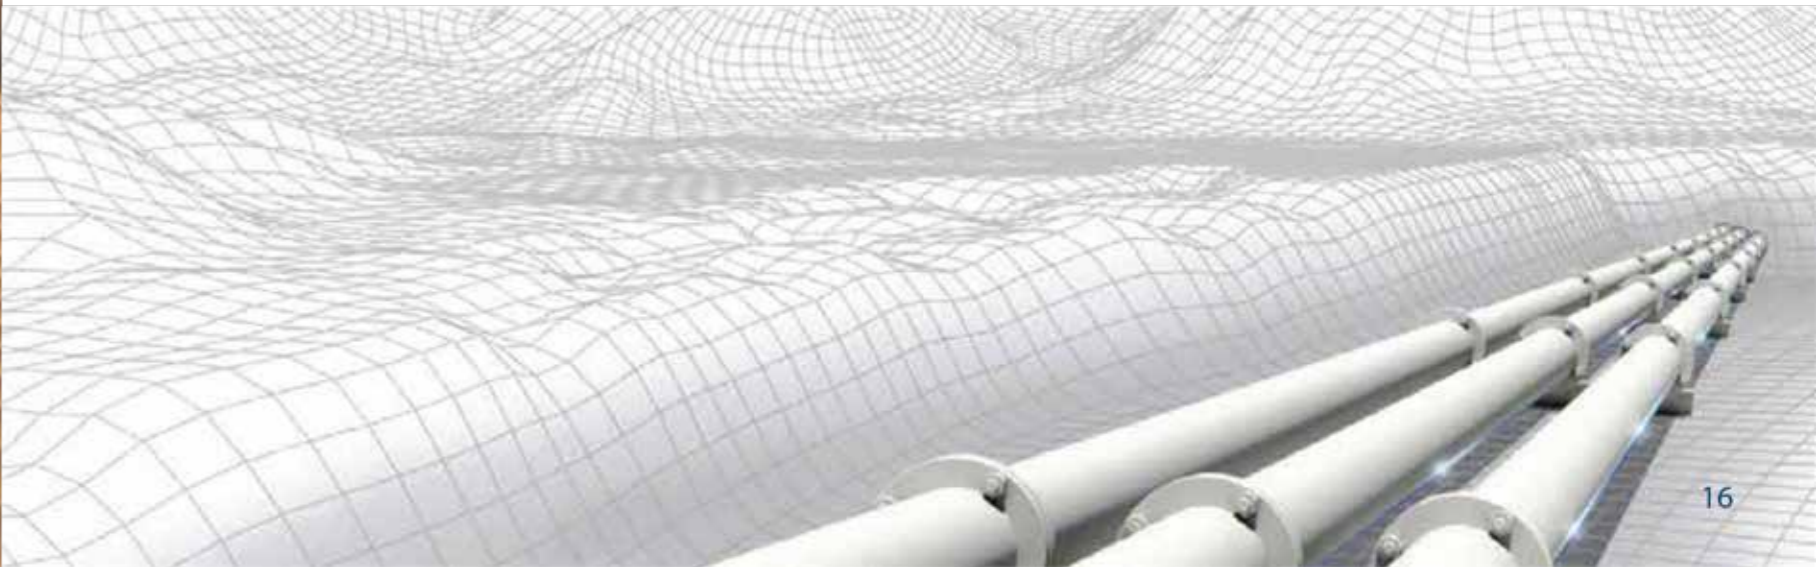

PIDS

Protection Specialists offers advanced Perimeter Intrusion Detection Systems (PIDS) designed for outdoor security, protecting sensitive, high-risk areas. Our Sabre range includes cutting-edge technology like Sabre II monitoring and alarm PCB, fiber optic sensor cables, and buried pressure sensors. Sabre PIDS uses fiber optic technology to monitor vibrations and compressions along perimeter fences, detecting intrusion attempts. When a breach or intrusion is detected, the system generates an alarm for remote monitoring, whether through a third-party system or our access control monitoring software. With Protection Specialists' Sabre Perimeter Intrusion and Protection systems, your outdoor security is in reliable hands, ensuring the safety of critical assets and environments.

Leak Detection System - LDS

In the realm of pipeline security, Protection Specialists rely on Leak Detection Systems (LDS) as a critical component of their strategy. These specialized systems are purpose-built to vigilantly monitor pipelines, constantly scanning for any hints of leaks or irregularities that might signify a potential breach in the pipeline's integrity. Their significance cannot be overstated, as they serve as a frontline defense, not only averting environmental harm but also upholding the safety of the pipeline itself and the surrounding areas.

INTRUSION SYSTEMS

Elevate security with Protection Specialists' range of Intrusion Detection Systems (IDS). These systems, incorporating sensors, video camera detection, and control units, enhance on-site security by preventing, detecting, and delaying unauthorized access. From human to AI monitoring, our comprehensive approach ensures heightened protection.

GUARD TOUR SYSTEM

Enhance efficiency with Protection Specialists' guard tour system. Tracking employee tours in diverse settings, it ensures timely and compliant rounds, optimising business performance, safety, and legal compliance.

PANIC SYSTEM

At Protection Specialists, our panic systems swiftly call for help. Integral to Hold-up alarm applications in Intrusion Detection Systems, panic buttons offer crucial notifications for critical situations. Available in wired or wireless options, they provide an essential lifeline for immediate assistance.

ELECTRONIC ARTICLE SURVEILLANCE (EAS)

Boost retail security with Protection Specialists' AI-driven EAS solutions. Counter shoplifting by tagging merchandise, intelligently deactivated during checkout. AI-enhanced detection triggers alarms at exits, vastly improving theft prevention.

NURSE CALL SYSTEM

Enhance healthcare with our AI Nurse Call System, enabling patients to easily request assistance.

Elevate security with AI metal detectors meeting global standards for uncovering hidden weapons.

AUDIO VIDEO INTERCOMS

Enhance security with our AI Video Intercoms, featuring high-res monitors, wide-angle cameras, night vision, and advanced audio.

EXPLOSIVE DETECTOR

Elevate security with AI-powered explosive detection for thorough screening and effective territorial control.

PEOPLE COUNTING SYSTEM

Enhance people counting with our AI-powered sensors for accurate counts in high-traffic areas and remote data access.

SCREENING MACHINES

Enhance security with AI-powered X-ray screening machines, crucial for thorough detection in various locations. Protection Specialists offers a comprehensive range of scanners, including Baggage, Cargo, Vehicle, and People Scanners.

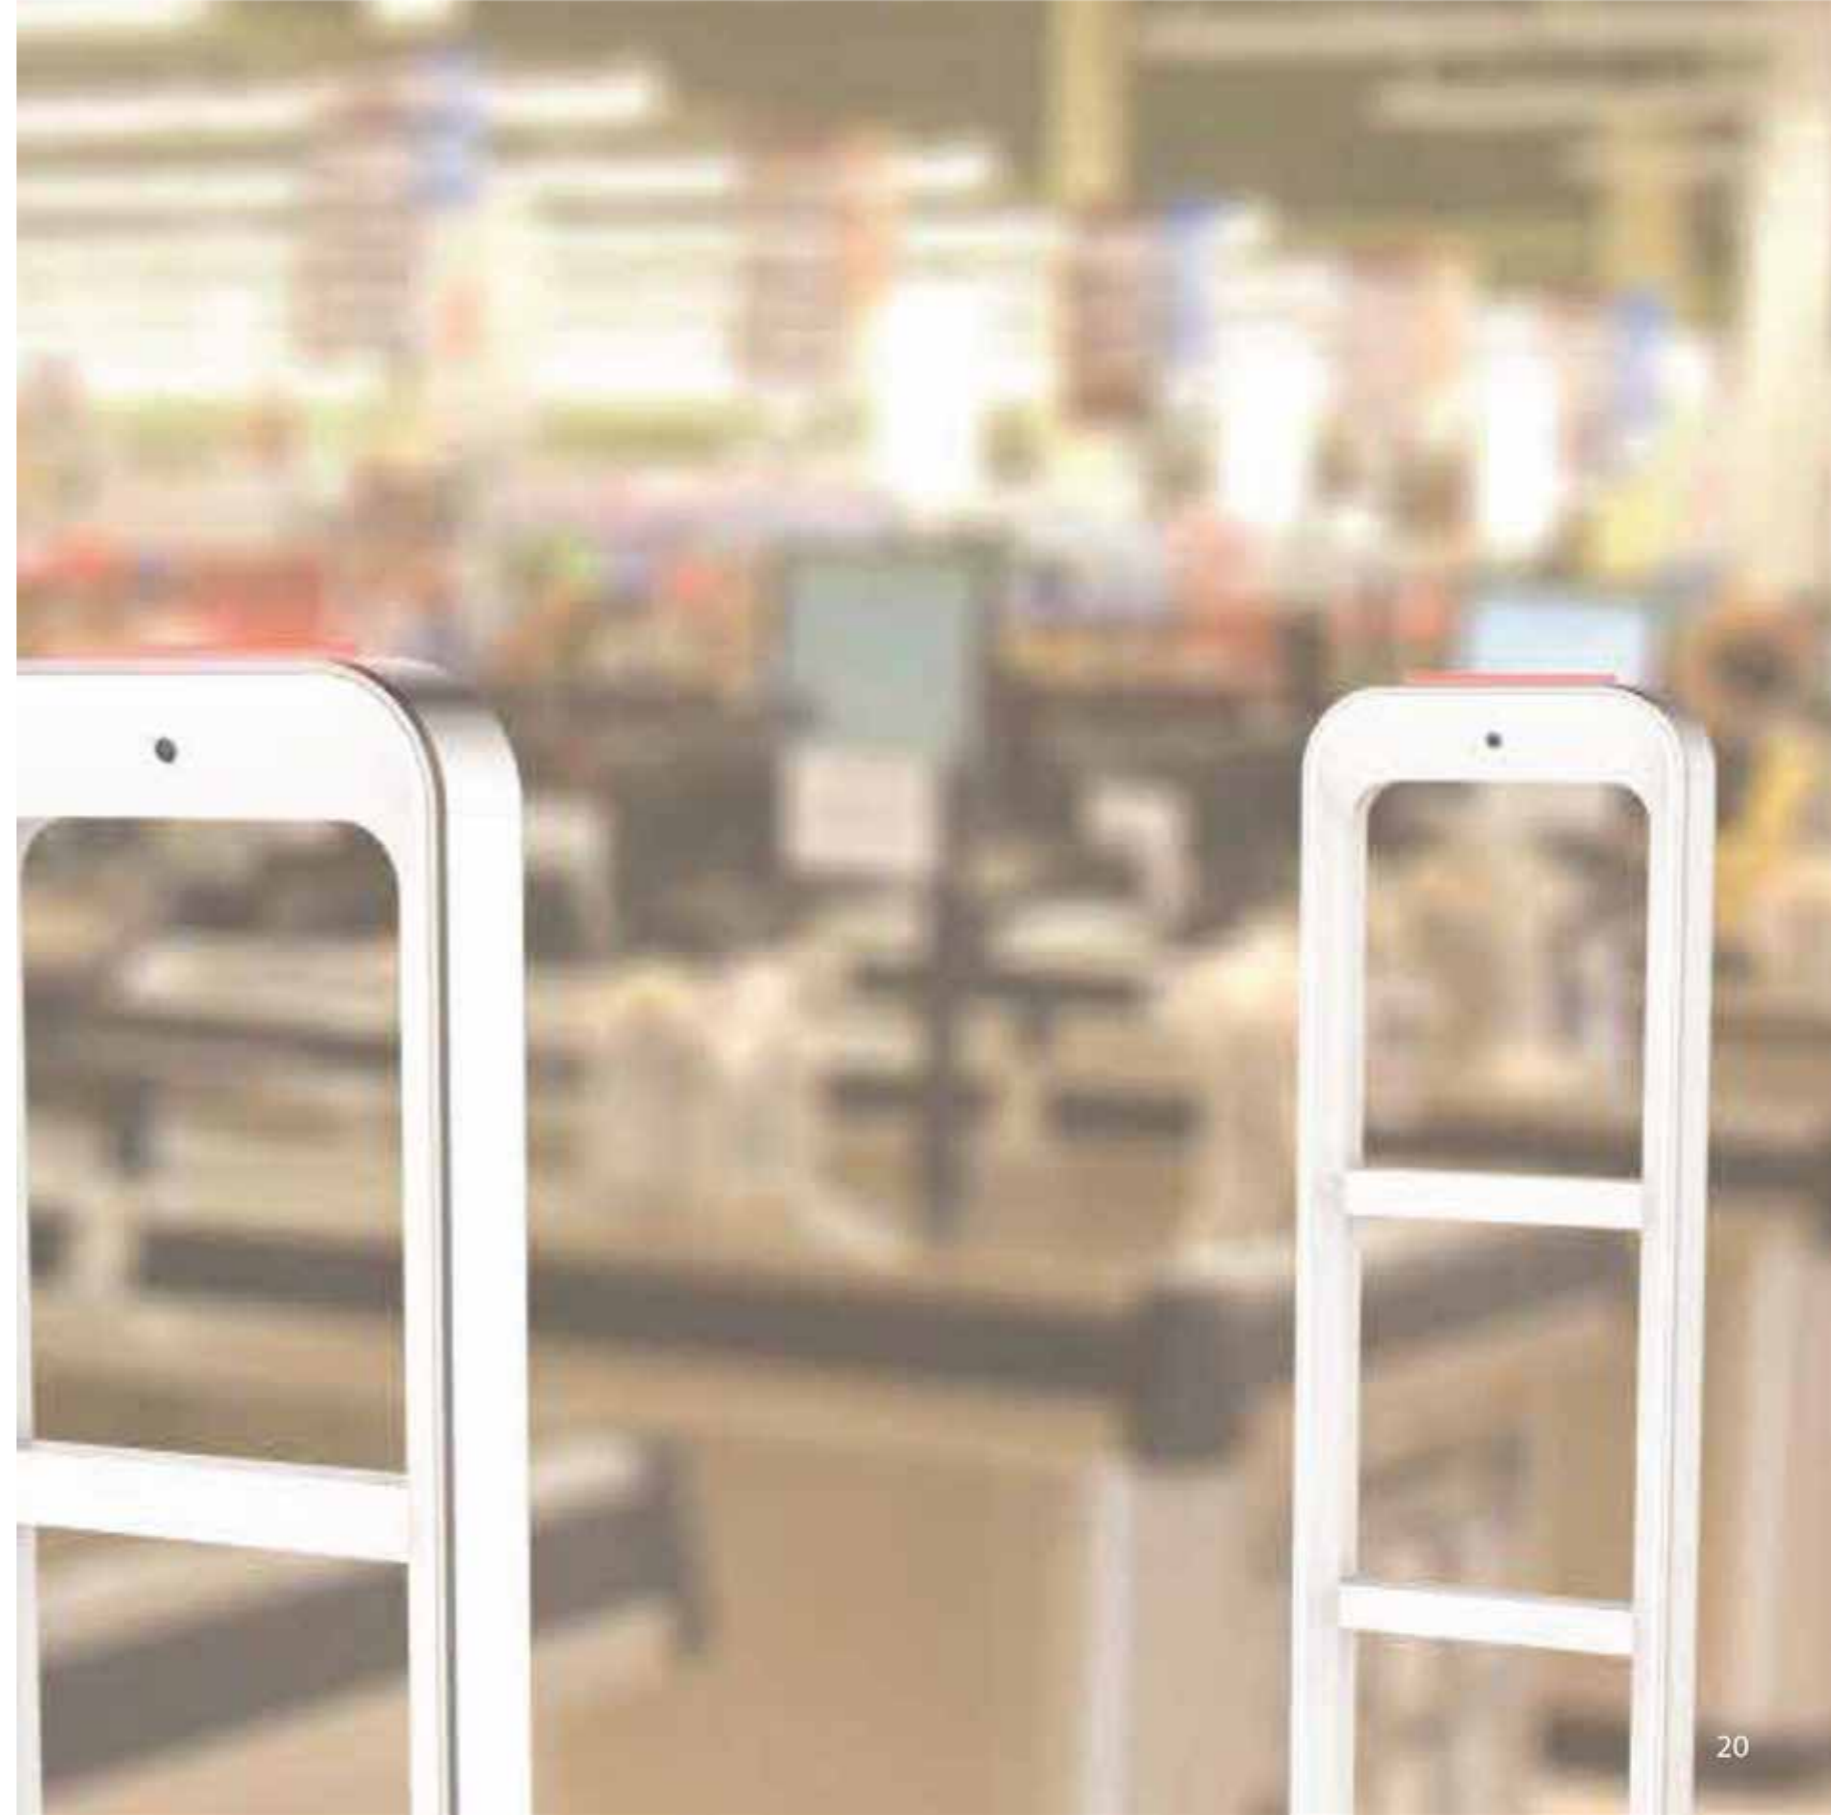

AUDIO VISUALS & MEDIA

Explore AI media solutions tailored to your project, including paging, music, and auditorium sound.

PABX

Elevate communication efficiency with Protection Specialists' AI-powered PABX, ideal for call centers and large businesses.

AUTOMATION.」

AUTOMATION.」

HOME AUTOMATION

Empower your living with our top-tier Home Automation solutions. As a frontrunner in the field, Protection Specialists brings your aspirations to life, enabling seamless control over every facet of your property. From Multi-room audio/video and Home theaters to Green energy lighting management, curtains, and blinds – we have you covered. Unlock the potential of Home Automation, granting you remote and automatic control over an extensive range of devices within your home. Stay informed even when away, with alerts for water leaks or unauthorized access. Whether through your iPhone, Android device, or remote control, you possess the power to adjust settings effortlessly. Dictate reactions, schedules, and preferences for an automated, intelligent, and cost-effective home. Experience convenience, control, and a smarter living environment with us.

SCADA

At Protection Specialists, we offer a comprehensive range of products and services in SCADA. Whether it's a single building or a multi-building campus, our solutions ensure efficient, secure, and reliable operations. Embracing green initiatives and regulatory compliance, we minimize costs while fostering safe and healthy work environments in commercial, retail, and industrial spaces. Our solutions seamlessly integrate with your existing systems using our powerful platform built on an open architecture, supporting various protocols like BACnet, LonMark, Modbus, and more. Our team, along with our trusted partners, brings a wealth of expertise to design and deliver these solutions. From flow meters and intelligent transmitters to energy management and asset control, Protection Specialists leads the way in addressing the challenges of modern facilities. Experience optimized operations with us.

BMS

Enhance operational efficiency and cut energy costs by simplifying facility management. Protection Specialists specializes in seamlessly integrating, installing, and maintaining building management systems. With full life cycle support, we elevate comfort, safety, and security for your occupants. Our building management systems monitor and control mechanical and electrical equipment, encompassing ventilation, lighting, power, fire, and security systems. By orchestrating control across all systems, you can achieve remarkable up to 35% reductions in energy consumption. Witness substantial savings in both operation and maintenance expenses for your facility. Elevate your management approach with us.

PARKING MANAGEMENT & GUIDANCE

Experience seamless parking with our cutting-edge Parking Management & Guidance Solution. This technology orchestrates vehicle movement within the parking facility, offering real-time occupancy updates. Drivers are guided to open spaces using intersection displays and color-coded LED lights—green for available, red for occupied, orange for reserved, and blue for disabled—positioned above each bay. Elevating customer service, it simplifies driving and parking via control signs, sensors, indicator lights, and data software. Say goodbye to parking stress and unauthorized usage, as our solution streamlines your parking experience. Park smarter with us.

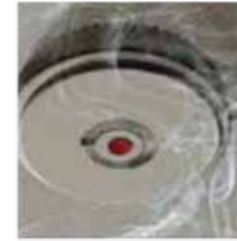

EQEUE MANAGEMENT

Streamline your customer experience with EQEUE MANAGEMENT. Tired of disorganized waiting areas, long customer wait times, and employee idle periods? Frustrated by unfair service allocation and the challenge of monitoring remote branches? You're not alone. We have the solution. Our Queue Management System addresses these issues and goes beyond, crafting an atmosphere where customers feel comfortable even while waiting. Elevate your competitive edge through enhanced customer experiences.

Fire Protection.」

FIRE PROTECTION.」

FIRE DETECTION

Explore our adaptable fire detection systems. Scalable for spaces of any size, they're designed for easy expansion from simple to complex setups. Protection Specialists' systems prioritize accuracy and ease of use. In emergencies, they trigger coordinated alarms, guide occupants with voice messages, and activate extinguishing systems swiftly. Your safety is our top concern.

FLAME DETECTION

Protection Specialist excels in flame and gas detection. We design, install, test, and commission SIL 2 Capable safety products, from conventional panels to globally certified addressable systems. Our unique advantage lies in our commitment to quality, manufacturing many of our detectors at a component level for precision. Our systems support various architectures with high fault tolerance and configurability. With optical technology utilizing UV, IR, UV+IR, Dual IR, and Multi-spectrum IR, our flame detectors maximize accuracy and minimize false alarms. Trust Protection Specialist for unparalleled safety and reliability.

GAS DETECTION

Protection Specialists is your premier source for top-quality flame and gas detection systems, along with comprehensive hazard mitigation solutions. Our expertise extends to designing, installing, testing, and commissioning SIL 2 Capable flame and gas safety products, ranging from traditional panels to fault-tolerant, globally certified addressable systems. What sets us apart is our commitment to customization. Many of the flame and gas detectors integral to our systems are manufactured at a component level, ensuring precision and uniqueness, setting us apart in the safety system industry. Our fire and gas safety systems support versatile architectures, including addressable-loop and point-to-point, all designed with a high level of fault tolerance and configurability. Our gas detectors, including nanotechnology metal oxide semiconductor (NTMOS) and catalytic types, provide precise detection of combustible and toxic gases. Choose Protection Specialists for cutting-edge safety solutions.

FIRE SUPPRESSION

Our fire suppression solutions combine cutting-edge technology and extensive expertise for ideal protection. We tailor each solution meticulously to enhance your business continuity. Our systems excel in early fire detection and swift suppression, safeguarding people, assets, and the environment. FM200, based on HFC 227ea and -42bar technology, is efficient and space-saving, ensuring uninterrupted business operations, even in low concentrations. It's safe for individuals and assets due to its chemical inertness and low electrical conductivity. Our clean agent systems, like 3M Novec 1230, ADS FM200, and Argonite, provide residue-free extinguishing, ideal for critical environments like data centers. We offer a comprehensive range of products, including fire alarm and suppression control units, smoke detectors, and advanced heat detection systems. Trust us for top-tier fire safety.

FIRE PROTECTION.」

FIRE-FIGHTING

Protection Specialists, a premier EPC company, specializes in protection systems for turnkey projects, covering every stage from concept to commissioning. Founded by technocrats with extensive expertise in fire protection, we offer tailored solutions for diverse industries. Our design adheres to global standards, backed by a qualified and dedicated team.

FIRE DOORS

Fire doors are essential for preventing the spread of fire and smoke between compartments, ensuring safe building evacuation. They possess a fire-resistance rating and are integral to passive fire protection systems.

FIRE EXTINGUISHERS

Since 1917, Kidde has pioneered fire safety. From home to business, we offer a wide range of extinguishers. Having one within reach can be life-saving. We're here to help you choose, install, and maintain the right solution. Your safety is our mission.

SAFETY EQUIPMENT

We offer a wide range of safety equipment to safeguard your home and office from fire damage. This includes photoelectric smoke alarms, heat sensors with power detection, spy camera smoke alarms, fire blankets, and fire-fighting helmets. Protect yourself, your family, and your workplace with our comprehensive safety solutions.

EVACUATION AND VOICE ALARM SYSTEMS

In today's complex buildings and infrastructures, ensuring safety is paramount. With a constant flow of people, not everyone is familiar with emergency exits. This poses a high risk in serious incidents. Our society strives to minimize such risks, making building owners and operators legally and morally responsible for safety, even in unforeseen events. Implementing effective alarm and emergency guidance systems demands experience and expertise. As a market leader in fire safety and security, Protection Specialists offers the necessary know-how to deliver efficient solutions tailored to your needs. Trust us for comprehensive safety solutions.

FIRE PROTECTION.」

HAZARDOUS PHONE

We specialize in designing Intrinsically Safe Telephones, crafted for usage in volatile environments such as chemical plants and refineries. These robust telephones are encased in durable glass-reinforced polyester, suitable for both indoor and outdoor use. They represent the safest and most cost-effective communication solution in hazardous settings.

HAZARDOUS LIGHT

Protection Specialists offers hazardous area lighting solutions tailored for environments where the presence of flammable vapors or gases, as well as combustible dusts, pose risks. Our expertise extends to marine applications, installations prone to vibration, and rough usage. Trust us for specialized lighting in hazardous areas.

TELECOMUNICATION.]

TELECOMUNICATION.]

TELECOMMUNICATIONS

At Protection Specialists, we optimize products through strong partnerships like Motorola Solutions, offering:

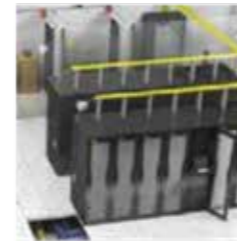

- 1- Two-Way Radio: Keeping your workforce connected and safe.**
- 2- Wireless Systems: Designing and deploying critical voice data, and video solutions.**
- 3- IP Communication: Award-winning IP voice, video, data, and mobility solutions.**

We provide end-to-end communication solutions, serving diverse clients with expertise in technical and cultural competencies, ensuring effective navigation in varied environments. Rest assured, we prioritize your communication needs and deliver reliably.

FIBER TO THE HOME

Protection Specialists offers Fiber to the home (FTTH) solutions, replacing copper with optical fiber for faster, more reliable communication. FTTH delivers high bandwidth for video, internet, and voice services. While it excels in speed and capacity, it may be cost-prohibitive in some setups. Nonetheless, it's the fastest and most weather-resistant technology. Our experienced engineers can implement FTTH for enhanced connectivity.

STRUCTURE CABLING SYSTEM FTTH

Protection Specialists offers top-tier structured cabling systems, designed to meet your current and future business needs. As your company grows, the demand for a robust cabling infrastructure becomes vital for sustained success. Our systems support various applications, including video, voice, data, and building automation, streamlining costs and space requirements. Trust in Protection Specialists for cutting-edge structured cabling technology.

DATACENTER EQUIPMENT

With over 9 years of experience, we specialize in uninterrupted power and environmental control for critical IT needs. Serving diverse sectors, including Banking & Finance, Healthcare, Manufacturing, Telecom and more, we offer:

- Uninterrupted Power Supplies (UPS)
- Electrical Power Distribution & Control
- Precision Air Conditioning Solutions

FACILITY MONITORING SYSTEM:

Whether it's technology, valuable documents, equipment, or priceless art, our solutions excel at swiftly detecting environmental threats. Our systems are trusted by thousands of facilities worldwide to safeguard against disasters. They offer complete peace of mind to facility managers, monitoring and addressing threats like temperature, humidity, fluid leaks, airflow, smoke, Power monitoring, access monitoring, and more.

DIGITAL TRANSFORMATION.」

DIGITAL TRANSFORMATION.」

DIGITAL STRATEGY:

We offer two key services:

1. Strategy and Transformation Support: Tailored strategies for digital evolution.
2. Data and Digital Audit: In-depth analysis to optimize and secure your digital presence.

DATA VISUALIZATION : Insightful solutions

Our services include:

1. Dashboard Creation: User-friendly, real-time insights.
2. Visualization: Clear data-driven visuals.
3. BI Reporting: Tailored reporting for smart decisions.

UI/UX: Elevating User Experiences

Our services cover:

1. Interactive Prototyping: Bringing ideas to life with engaging prototypes.
2. User Testing & Research: Informed design through user feedback.
3. Responsive Design: Crafting seamless experiences across all devices.

E2E Customer Journey Design: Transforming Experiences

Our services entail:

1. Customer Journey Mapping: Illuminating touchpoints and interactions.
2. Contact Point Assessment: Evaluating customer engagement.
3. Customer Journey Redesign: Enhancing the end-to-end experience.

Web & Mobile App Development: Crafting Digital Excellence

We specialize in developing:

Modern Web and Mobile Applications: iOS, Android, Javascript, .NET, WordPress, PHP, and more. Our expertise ensures cutting-edge digital solutions for your business needs.

Front & Back-End Development: Tailored Software Solutions

Our services encompass:

- Custom Software Development: Crafted to meet your unique requirements.
- Integrations and Database Architecture: Seamless connections and robust data structures.

CYBER SECURITY.」

Based on our team's experience in cyber security, PROTECTION SPECIALISTS designs, integrates and deploys cyber security solutions to corporate and governmental organizations to operationalize their information security policies, such as:

CYBER SECURITY SOLUTIONS.」

Turnkey Secure Operations Centers (SOC):

PROTECTION SPECIALISTS provides ready-to-use Secure Operations Centers (SOCs) that serve as centralized hubs for monitoring, detecting, and responding to cybersecurity threats. These turnkey solutions streamline the establishment of robust security infrastructures.

CYBER TRAINING AND SIMULATION PLATFORMS:

Our cyber training and simulation platforms offer realistic environments for organizations to train their personnel in handling various cyber threats and incidents. These simulations enhance the skills and preparedness of security teams.

CYBER DECEPTION SOLUTIONS:

PROTECTION SPECIALISTS implements cyber deception techniques to mislead and divert attackers. These solutions create a deceptive environment to detect and analyze threats while protecting critical assets.

TURNKEY DIGITAL FORENSICS LABORATORIES:

At PROTECTION SPECIALISTS, we offer comprehensive Digital Forensics Laboratories, thoughtfully equipped with state-of-the-art tools and cutting-edge technologies. These advanced facilities empower organizations to conduct meticulous forensic investigations and gather irrefutable evidence suitable for court proceedings. Our expert forensic team specializes in a wide range of data extraction, including audio, video, photo, social network, and comprehensive phone and PC data extraction. We ensure that every piece of digital evidence is meticulously examined, preserving the integrity of information critical to legal cases. With our Digital Forensics Laboratories, you can trust in the reliability and credibility of the evidence presented in court, strengthening your position in legal matters.

CERT AND CSIRT CAPACITY BUILDING SOLUTIONS:

Our capacity building solutions focus on enhancing the capabilities of Computer Emergency Response Teams (CERT) and Cyber Security Incident Response Teams (CSIRT). We offer training, tools, and knowledge transfer to ensure effective incident response.

CYBER SECURITY SOLUTIONS.]

Cyber Governance Monitoring Tools:

Our specialized monitoring tools are tailor-made for government agencies to fortify their cyber governance initiatives. These advanced tools offer unparalleled insights into compliance, risk management, and policy enforcement, constituting a fundamental pillar of proactive cybersecurity. By diligently monitoring network traffic, government bodies can swiftly identify and address potential threats, reinforcing national security objectives and preserving the integrity of mission-critical systems. Our solutions deliver the essential visibility and control needed to counter cyber threats in an ever-evolving digital landscape, empowering governments to maintain a vigilant stance in safeguarding their digital infrastructure.

Deep Packet Inspection:

PROTECTION SPECIALISTS employs deep packet inspection techniques to analyze network traffic at a granular level. This allows for real-time threat detection and the identification of malicious activities within data packets.

Data Retention Solutions:

Our data retention solutions help organizations securely store and manage their data for compliance and investigative purposes. We offer strategies and technologies to retain data while maintaining its integrity and security.

Spectrum Monitoring and Management:

Our Spectrum Monitoring and Management solutions are engineered to not only safeguard wireless communication channels but also proactively address the misuse of spectrum resources. We are dedicated to ensuring the availability and integrity of critical communication infrastructure. Our advanced technology allows us to swiftly identify and locate instances of interference and vulnerabilities, enabling regulatory authorities to take precise and effective control measures. By monitoring and managing the spectrum with precision, we help guarantee the reliability and security of wireless communications in an ever-evolving digital landscape.

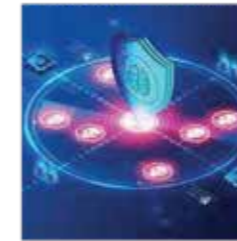

Digital Forensics:

Our digital forensics services encompass the meticulous collection, preservation, and analysis of digital evidence obtained from diverse sources. We specialize in uncovering the origins of cyberattacks and providing critical support in legal proceedings when required. Our expertise extends to gathering a wide range of evidence, including audio, video, photo, social network data, as well as comprehensive phone and PC data extraction. With our comprehensive approach, we ensure that no digital stone is left unturned, empowering you with irrefutable evidence for your investigative and legal needs.

CYBER SECURITY SERVICES.]

PROTECTION SPECIALISTS leverages its expertise in cyber security to offer a comprehensive suite of solutions and services to corporate and governmental organizations. These solutions encompass a wide range of cybersecurity needs, from threat detection and response to training and compliance management, ultimately strengthening the overall security posture of our clients.

THREAT INTELLIGENCE:

Our Threat Intelligence service gathers data from diverse sources, aiding in credential identification, brand protection, and system patch prioritization.

INCIDENT RESPONSE:

Our expert team and partners assist in breach recovery, incident analysis, and recovery plan creation to mitigate damage and prevent future incidents.

Portal Protection:

We partner with digital identity experts to secure customer portals from hackers, taking a proactive approach to prevent threats and ensure online platform security.

PENETRATION TESTING:

Our global experts evaluate web, mobile, and custom app security, identifying vulnerabilities and suggesting protective measures.

Threat Detection:

Strengthen your cybersecurity with our 24/7 intrusion detection system and real-time threat response.

Training:

Empower security professionals to detect, analyze, and investigate cyber incidents with our tailored sessions by senior consultants, staying ahead of evolving threats.

SECURE IDENTITY.」

SECURE IDENTITY.」

E-PASSPORT

An e-Passport is equipped with an electronic chip housing the holder's biographic information, including name and date of birth, mirroring the printed data. Additionally, it incorporates a biometric identifier. E-Passports from Visa Waiver Program (VWP) nations come with robust security features to thwart unauthorized data access or "skimming" from the chip.

DRIVER LICENSES AND VEHICLE REGISTRATION CARDS

The driver's license serves a dual purpose: granting driving privileges and often functioning as an identity document, especially in countries without national ID cards. Therefore, ensuring its high-level security is crucial.

IDENTIFICATION CARDS

We are a trusted global supplier of critical identification cards and documents, renowned for our world-class security features and data protection. With extensive experience, we offer cutting-edge solutions for your security requirements. Rest assured, you're choosing the most experienced and trusted supplier for identification products worldwide.

SECURE VEHICLE PLATES AND RFID TAGS

RFID labels serve as a powerful gateway for services such as vehicle tracking, traffic management, and access control. They play a strategic role by not only consolidating these services but also ensuring the highest levels of data security.

RESIDENCY PERMITS AND WORK PERMITS

We specialize in processing and issuing residency and work permits, ensuring a secure and transparent method for identifying foreign nationals while standardizing foreign employment processes.

SECURE IDENTITY.]

LAND REGISTRY SOLUTION

Land registries ensure property rights' legal reliability and offer accessible ownership verification through biometric and historical data. Automation enhances efficiency and transparency, standardizing practices and improving access to land information records.

eVISAS, eGATE AND BORDER CONTROL

Border agencies must handle increased traveller numbers while ensuring security and efficiency. We help them leverage technology to streamline border management, visa processes, and document verification, ensuring a seamless and secure experience.

CIVIL REGISTRY SOLUTION

Our Civil Registry Solution is vital for managing citizens' records, including birth, marriage, divorce, and death certificates. It's crucial for national security and identifying citizens. We offer secure civil registration solutions to address your identification and authentication needs.

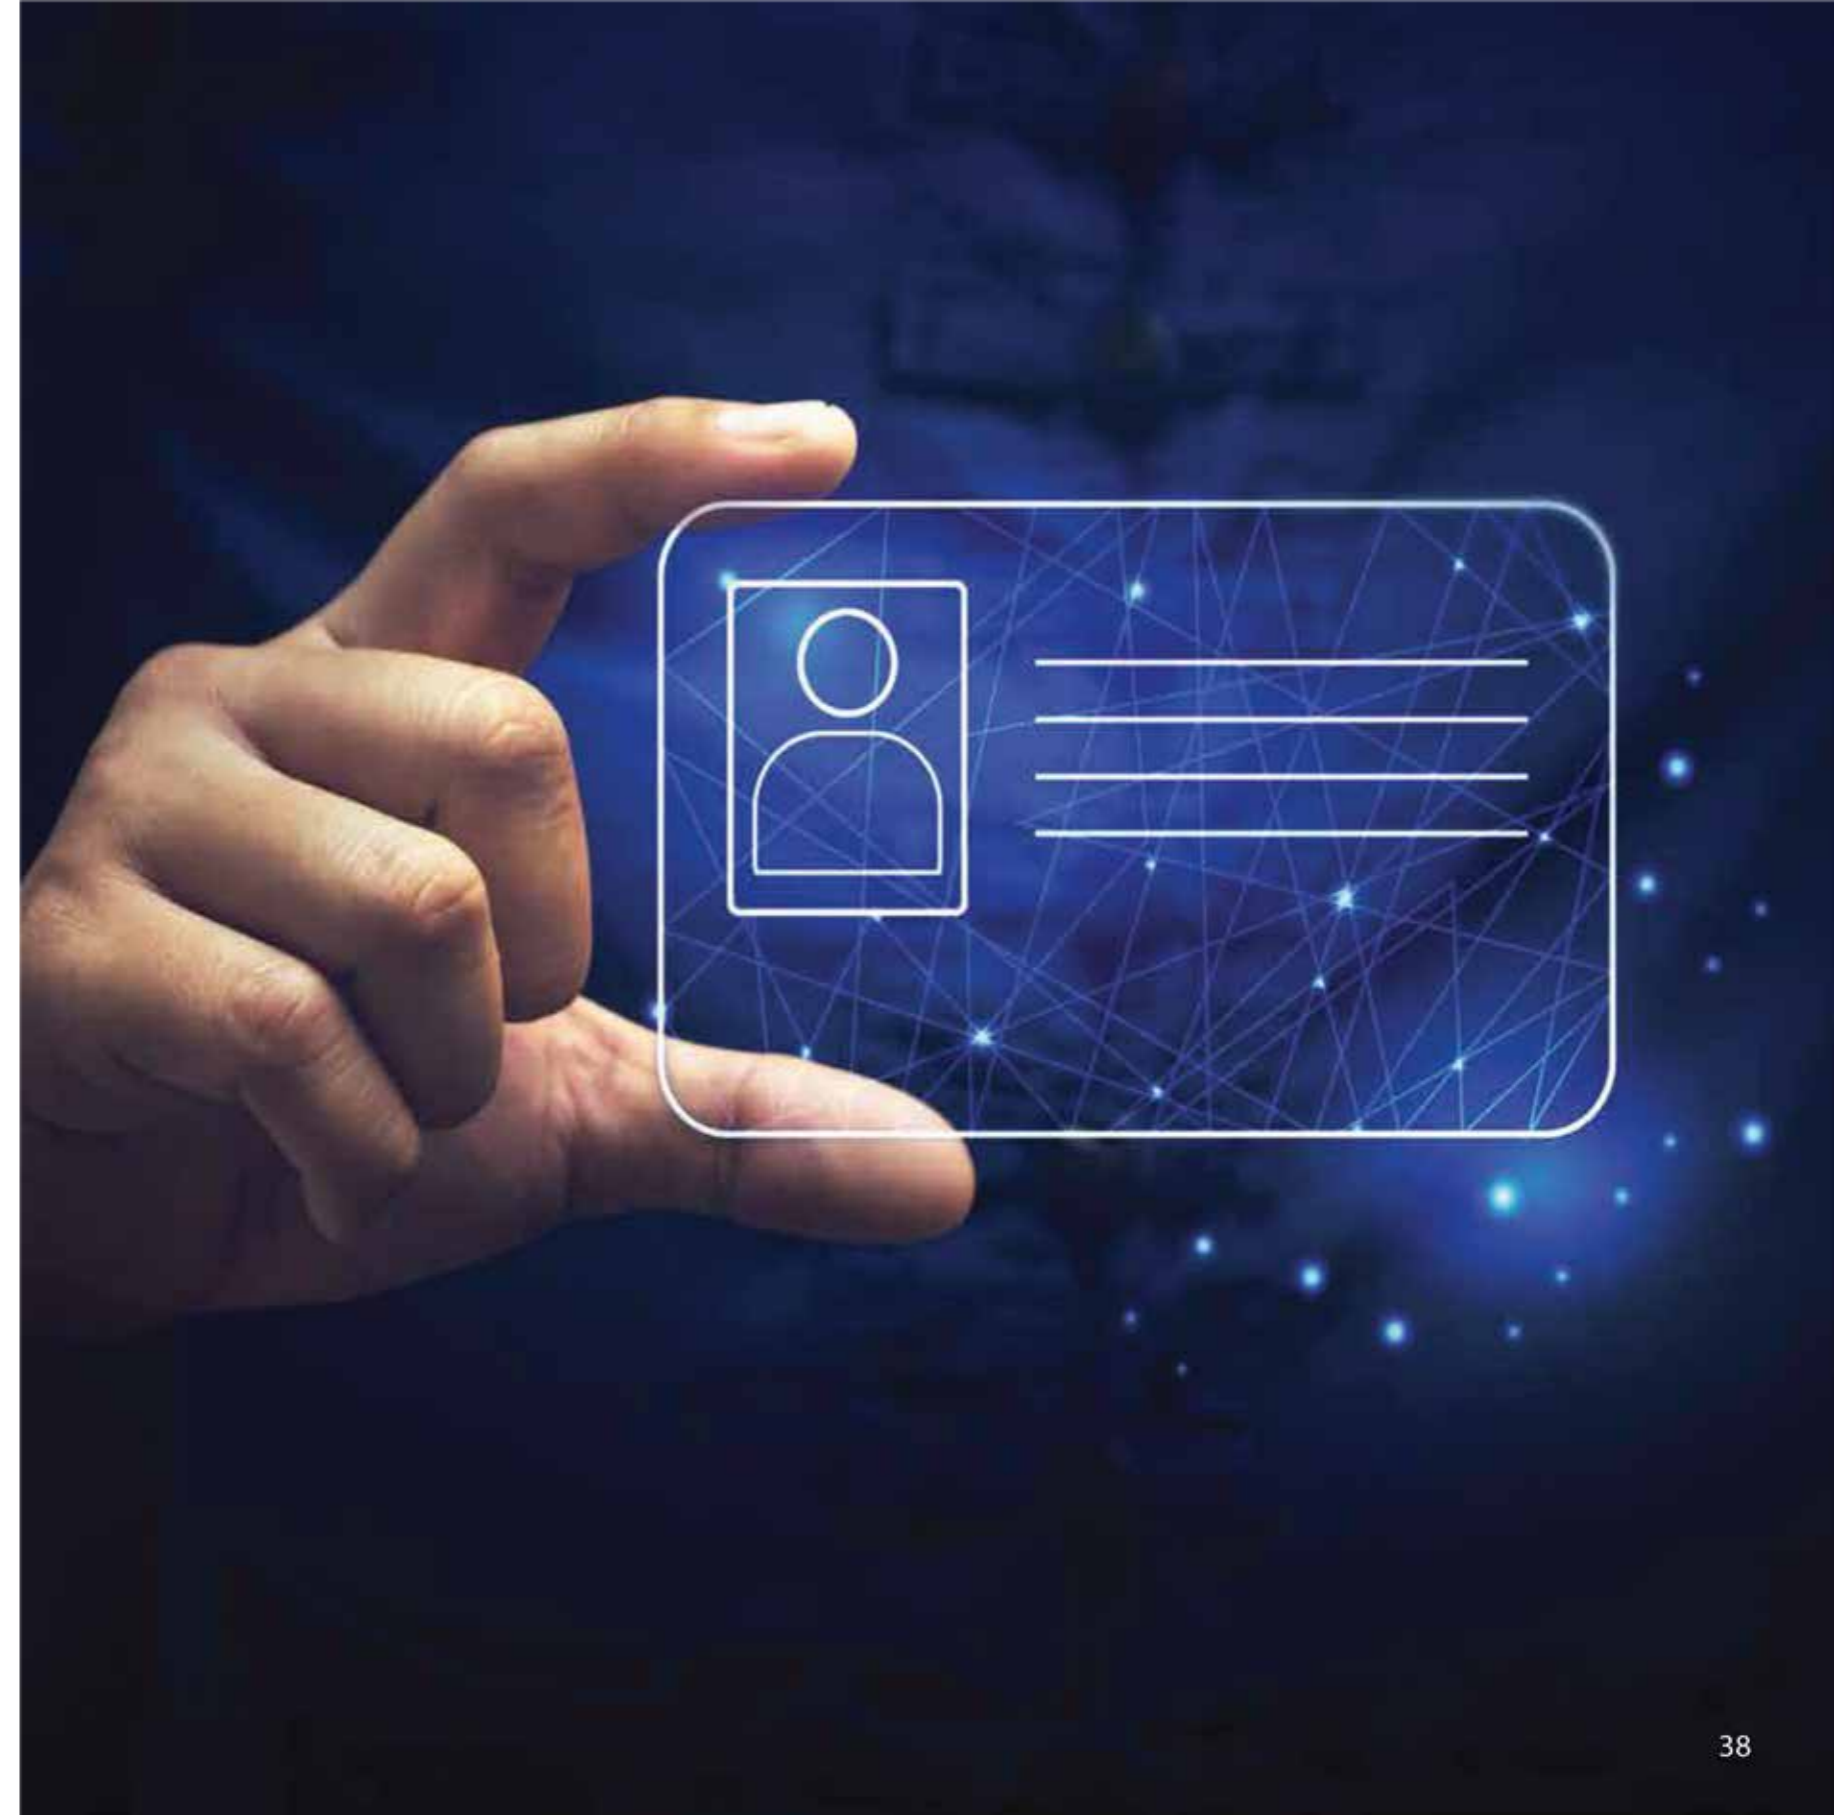

ELECTION PROCESS MANAGEMENT

Elections are the foundation of democracy, allowing citizens to choose representatives, shape policies, and hold leaders accountable. Yet, organizing elections is a massive logistical challenge involving technology, resources, and communication. Despite the dedicated efforts of electoral officials, issues like long polling station queues, low voter registration, and demotivated staff can hinder the quality of elections and, consequently, democratic governance.

MULTI-PURPOSE IDENTIFICATION SOLUTIONS

Protection Specialist provides ideal industrial multipurpose card solutions for both corporate and small-medium enterprises, seamlessly integrating convenience into smart card platforms. Our high-quality cards, equipped with technical features like chips and sensors, enhance trade efficiency. Beyond their appealing design, our cards offer security and control. Whether you require Loyalty Cards, ID Cards, Key Cards, Access Control, or Lanyards, we offer a range of technology-enabled multipurpose cards, from highly secure options to durable cards for rigorous use. We employ Quick & Clean technology for smooth, perforation-free edges, ensuring your professional cards exude simplicity and elegance.
